

Summary of Information NCAA Graduation Rates Report 2017-18 Cohort

The _____ shows the percentage of first-time freshmen who were enrolled full-time and entered the University during the 2017-18 academic year who graduated within six-years. For student-athletes, it only counts those first-time

The Student-Athlete _____ also includes students who transferred into the University and participated in athletics, those that enrolled mid-year and participated, and first-time freshmen who were not receiving athletics scholarship that participated in athletics. The ASR also removes student-athletes who left prior to graduation that had athletics eligibility remaining but were reported as academically ELIGIBLE when they left the University.

The _____ combines the given year data (2017-18) with the three previous freshman classes using the data from the previous years.

In sum, the Graduation Rate for student-athletes for this cohort decreased slightly from the previous cohort year but remained within a consistent range of three-years of cohorts. The Academic Success Rate for this cohort decreased slightly but remains near the 80th-percentile from the last four-year average. Furthermore, the four-year average for student-athletes is higher than that of the general student body.

Student-athletes in this cohort graduated above the overall undergraduate enrollment in this cohort and the four-class average is the higher as that of the general student body. Lastly, the academic success rate, while dipping from the previous three years, still remains high for student-athletes.

NCAA DIVISION II GRADUATION RATES INSTITUTION REPORT INFORMATION

Introduction.

This information sheet and the NCAA Division II Graduation Rates Institution Report have been prepared by the NCAA, based on data provided by member institutions in compliance with NCAA Bylaw 7.8.2.1 (Admissions and Graduation-Rate Disclosure) and the federal Student Right-to-Know Act. Please note, the NCAA will make this report public by 8/3/08.

The Graduation Rates Institution Report gives graduation information about the most recent six-year graduating class of students and student-athletes who entered as freshmen in 2017-18. The graduation rate (percent) is based on a comparison of the number (N) of students who entered a college or university and the number of those who graduated within six years. For example, if 100 students entered and 60 graduated within six years, the graduation rate is 60 percent.

The Graduation Rates Institution Report provides information about two groups of students:

1. All Students.

All undergraduate students who were enrolled in a full-time program of study for their baccalaureate degree; and

2. Student-Athletes.

Student-athletes who received athletics aid from the school for any period during their entering year. [Note: Athletics aid is a grant, scholarship, tuition waiver or other assistance from a college or university that is awarded based on a student's athletic ability.]

Two different measures of graduation rates are presented in this report: Federal Graduation Rate and NCAA Division II Academic Success Rate (ASR). The Federal Graduation Rate indicates the percentage of freshmen who entered and received athletics aid during a given academic year who graduated within six years. The ASR adds to the first-time freshmen, those students who entered midyear, first-time freshmen who did not receive athletics aid but participated in athletics (i.e., walk-ons), as well as student-athletes who transferred into an institution, received athletics aid or were on the roster at the start of the championship season their first year at the institution. Both the Federal Graduation Rate and the ASR subtract students from the entering cohort who are considered allowable exclusions (i.e., those who either die or become permanently disabled, those who leave the school to join the armed forces, foreign services or embark on a religious mission). In addition, the ASR subtracts those who left the institution prior to graduation, but had athletics eligibility remaining and would have been academically eligible to compete had they returned to the institution.

Graduation Rates Report.

The box at the top of the Graduation Rates Institution Report provides the most recent class (i.e., 2017-18) and four-class Federal Graduation Rate (i.e., 2014-15 through 2017-18) for all students and for student-athletes who received athletics aid at this school. Additionally, this box provides ASR data (i.e., 2014-15 through 2017-18) for student-athletes.

b. Student-Athletes.

This section identifies how many student-athletes were enrolled and received athletics aid for the 2023-24 academic year, and the number of men and women in each racial or ethnic group.

c. Student-Athletes by Sports Categories This section provides the enrollment data as identified in 2-b for each of the eight sports categories.
